Date	Description
2014-02-02	Initial version.
2018-11-13	Moved IrpMaster and IrScrutinizer from current to here.

Table 1: Revision history

1 Content

- [IrMaster](#), a general purpose IR program, now discontinued and superseded by IrScrutinizer.
- [IrpMaster](#), the IR renderer, as a library and command line program. Now discontinued, replaced by [IrpTransmogriifier](#)
- [HarcToolbox](#), the old main project, no longer developed. Note that the name "HarcToolbox" denotes both this project, and the web site. Sorry for the confusion.
- [Transforming XML Export from Ir\(p\)Master](#), a tutorial article on generating "interesting stuff" (here, C code) from the XML export of IrpMaster and IrMaster. It is obsolete, since IrScrutinizer uses a different format ([Girr](#)) that is not quite compatible with the very simplistic XML format of IrMaster and IrpMaster. Actually, the XML export of these programs became obsolete before I had the time to document them...
- [Lirc2xml](#), a program for extracting IR codes from LIRC files. This is a patch to Lirc 0.9.0, and produces a command line C program. It is superseded by Jirc, written entirely in pure Java, thus attractive to integrate into other programs, like IrScrutinizer, offering a nice GUI.
