HARCToolbox file repository

On this page, it will be possible to access individual device configuration files, protocol files, as well as DTD/Schema files.

- IrpProtocols.ini. Almost all of the internet's collected (public) knowledge on IR protocols is collected herein — thanks to the JP1- and RemoteCentral forums.
- Intertechno.xml Pronto codes for the Intertechno (and similar) RF switches (with codewheel). Note that this file is only of historical interest, since the present version of Ir(p)Master can generate export files for this protocol.
- conrad.txt Pronto codes for the RF switches once manufactured by Conrad electronics, sometimes known as RS-200. Note that this file is only of historical interest, since the present version of Ir(p)Master can generate export files for this protocol.
- IrpMaster.html. Documenatation for the IrpMaster program, as plain HTML file. This is just a stand-alone, plain and "ugly" format of the IrpMaster documentation.
- IrMaster.html. Documenatation for the IrMaster program, as plain HTML file. This is just a stand-alone, plain and "ugly" format of the IrMaster documentation.
